

# Forests of the Future

## Bring back iconic American trees!

July 11, 2018 | 6 PM Reception | 7 PM Panel  
Fayette Co. Extension Office, 1140 Harry Sykes Way, Lexington, KY

Can we bring back tree species lost to invasive insects and diseases?

Our scientists think so! Researchers are working to restore native chestnut, ash, hemlock, and elm. In this seminar, hear updates from scientists across the country representing various tree restoration projects including:

Free and open to all!  
Refreshments and snacks included

*Seminar brought to you by the Forest Health Research and Education Center in partnership with the TreeSnap app, Treesnap.org. Funding provided by the NSF PGRP program.*
